

Fiber Cleaning Tips and Adapters

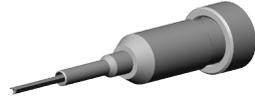

VIAVI Solutions offers a wide variety of tips, adapters and guides for cleaning fiber connector end-faces. Browse through this comprehensive guide to determine what you need.

The FCLT Series cleaning tips attach to the **CleanBlastPRO™** and legacy **CleanBlast™** systems. FCLT tips can support both PC/UPC and APC polish types with the same tip. A "CF" designation in a part number indicates that this tip has been engineered not to make contact with the ferrule. Some of the tips are used in conjunction with a guide, as shown in the images below.
